VISUAL IDENTITY

premium: cybersecurity × technology × career progression × cinematic realism. Prefer realistic humans, believable offices, modern data centers, dark cinematic environments, dramatic practical lighting, subtle blue/white technology accents, shallow depth of field, realistic monitors, authentic workplace environments, cinematic camera movement, physically believable movement, premium commercial cinematography. Avoid cheesy stock footage, floating holograms everywhere, ridiculous Matrix-style effects, fake certificates, fake exam questions, unreadable computer screens, excessive neon, cartoonish cybercrime imagery.

IMPORTANT H3 PROMPT RULE

Generate the visual story, not the entire advertisement as one giant text-heavy scene. AI-generated typography can be unreliable. Keep important marketing copy for the post-production overlay. The visual should create the emotion. The editor adds: HOOK → captions → URL → CTA.

UNIVERSAL 15-SECOND DIRECT RESPONSE TEMPLATE

0–2 seconds HOOK: "YOUR CERTIFICATION EXAM IS COMING." Visual: Immediate human emotion. No logo. No website. No introduction. 2–5 seconds PAIN: difficult question, confusion, exam anxiety, lack of preparation, career frustration. Voice: "But are you actually ready?" 5–10 seconds SOLUTION: practice questions, explanations, focused studying, confidence, professional environment. Voice: "Practice before exam day." 10–15 seconds OFFER: "300+ COURSES" / "60K+ PRACTICE QUESTIONS" / "LIFETIME ACCESS" Voice: "Prepare smarter with RealWorldCerts." Final: "REALWORLDCERTS.COM"
